

**Capacity Europe 2018**

London, October 23-25, 2018

Stand 125

**B2B Telecom – Fibre**

**Kosc Telecom's E-Access Fibre: two MEF-compliant products to bring fast and easy connectivity to millions of buildings in France**

*Kosc Telecom announces the launch of its brand-new E-Access Fibre offer, including 2 MEF-compliant products: E-Access Dynamic and E-Access Connected. E-Access Fibre ensures transparent guaranteed symmetrical bandwidth, with the highest E-Access standards and SLAs. Over one million buildings in France are already connected to E-Access Fibre, enabling fast service delivery for global carriers' customers.*

**Paris, 23rd October 2018** – At [Capacity Europe 2018](#) (London, 23rd to 25th October 2018), Kosc Telecom, the French wholesale-only CaaS provider, will introduce a new service to the global carrier market to fulfil their customers' connectivity needs in France: E-Access Fibre.

Kosc's E-Access Fibre comes as a **complementary service** to its **Best Effort Fibre**, launched in April 2018. Best Effort Fibre already offers a breakthrough service with bandwidth up to 1Gbp/s download and 250 Mbp/s upload. Thus, E-Access Fibre will deliver **transparent, guaranteed symmetrical bandwidth from 10Mbps to 1 Gbps, with the highest E-Access standards and SLAs in France.**

E-Access Fibre relies on two MEF-compliant products: **E-Access Fibre Dynamic** targets premises that need **fast and transparent connectivity, based on a dynamic flow management**, whereas **E-Access Connected** targets premises that require **fast and transparent connectivity, based on a dedicated management.**

With this complementary service, Kosc Telecom is now offering the most complete fibre portfolio in France serving global carrier fibre needs, with the best coverage for E-Access Fibre & Best Effort Fibre. Overall, as of 2018, **8 million best-effort fibre lines** and **over 1 million buildings already connected to E-Access Fibre** are available nationwide. Over 180 cities have been connected to date, including all major cities such as Paris and Marseille as well as smaller cities such as La Rochelle and Annecy.

Antoine Fournier, CEO at KOSC Telecom: "*Kosc is the very first to market such a comprehensive service to global carriers in France. In contrast to FttO offers, access to E-Access Fibre is completely industrialised, which means reliable eligibility and quote but also fast service delivery for global carriers' customers. With our CaaS solution, we want to offer a seamless customer journey and enable global carriers to order and easily monitor their E-Access Fibre services from start to finish. This new step is in line with our commitment to pave the way for fibre migration for all business premises located in France.*"

E-Access Connected is already available through Kosc's CaaS solution. E-Access Dynamic is coming at the beginning of 2019.

**Kosc Telecom will exhibit at Capacity Europe, London, October 23-25, 2018: stand 125.**

**About KOSC Telecom**

Established in March 2016, Kosc Telecom is the French wholesale-only CaaS provider. CaaS stands for Connectivity as a Service, a whole new way of helping customers increase their business. Thanks to its fully integrated and automated CaaS solution, available through web services (Extranet & APIs), Kosc Telecom is committed to delivering the best customer experience. From a unique interface, you can get access to the most comprehensive wholesale coverage in France and monitor it from start to finish. Indeed, with a state-of-the-art broadband and fibre optic infrastructure, connecting over 180 cities nationwide, the carrier is now opening the way for fibre migration to every company in France.
